2028_REC_OOPS using Java_Week 2_Q8

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

A bank generates secure codes using 3-digit numbers where each digit is unique, and the code must be divisible by 3. You are tasked with generating the first N such codes based on user input, ensuring the digits are unique and the number is divisible by 3.

Note: Use nested for loops to solve.

Input Format

The first line contains an integer N representing the number of valid codes to generate.

Output Format

The output prints N line,s each line contains a valid 3-digit code.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 5

Output: 102

105

108

120

123

Answer

// You are using Java

```
import java.util.Scanner;
```

```
class main{
```

```
    public static void main(String[] args){
```

```
        Scanner x = new Scanner(System.in);
```

```
        int a,z,i,j,k;
```

```
        a=x.nextInt();
```

```
        z=0;
```

```
        for(i=1;i<=9;i++){
```

```
            for (j=0;j<=9;j++){
```

```
                for(k=0;k<=9;k++){
```

```
                    if(i!=j && j!=k && i!=k){
```

```
                        int num=(i*100)+(j*10)+k;
```

```
                        if(num%3==0){
```

```
                            System.out.println(num);
```

```
                            z++;
```

```
                            if(z==a){
```

```
                                return;
```

```
                            }
```

```
                        }
```

```
                    }
```

```
                }
```

```
            }
```

```
        }
```

```
    }
```

```
}
```

Status : Correct

Marks : 10/10
