## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 2\_Q7

Attempt : 2

Total Mark : 10

Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

You are taking part in a coding challenge where your task is to design a program that conjures a mesmerizing numerical pyramid pattern. The enchanting pattern is fashioned using a for loop and is customized based on user input.

Participants are prompted to unveil the pyramid's magic by specifying its height - essentially dictating the number of rows in this spellbinding creation.

Write a program that employs to weave this captivating numerical pyramid as shown below.

Example

Input:

4

Output:

### ***Input Format***

The input consists of a positive integer  $n$  representing the number of rows in the pattern.

### ***Output Format***

The output prints the required pyramid pattern, as shown in the sample output.

Refer to the sample output for the formatting specifications.

### ***Sample Test Case***

Input: 4

Output: 1  
123  
12345  
1234567

### ***Answer***

```
// You are using Java
import java.util.Scanner;
class main{
    public static void main(String[] args){
        Scanner x = new Scanner(System.in);
        int a,i,j,z;
        a=x.nextInt();
        for(i=1;i<=a;i++){
            for(int s=1;s<=a-i;s++){
                System.out.print(" ");
            }
            z=2*i-1;
            for(j=1;j<=z;j++){
                System.out.print(j);
            }
        }
    }
}
```

```
        }
        System.out.println();
    }
}
```

**Status : Correct**

**Marks : 10/10**
